

Doubrava Česka

*Tung oil with Carnauba wax
for wood in the sauna*

Description

Doubrava Česka is a professional product for the protection of the bath and sauna. The safest and most durable natural tree protection in the steam room and dressing room. Powerful water repellency-wood is always dry and therefore does not rot. Especially strong-based on tung oil and Carnauba palm wax - the most durable natural ingredients. It has almost no smell characteristic of drying oils. Without antiseptics and artificial substances - Your health is protected. Double protection against rotting due to the presence of water-based bactericidal minerals in the composition.

Purpose

For all surfaces in the steam room and the dressing room of baths and saunas-walls, floors, shelves, accessories.

Application

The wood should be well dried. Clean the surface from old coatings and sand it with P100-120 abrasive. Mix the oil well and apply the 1st layer with a brush or roller with excess on the wooden surface. After 15-20 minutes, wipe the surface with a lint-free cloth and remove any excess. After 2-4 hours, similarly apply the 2nd layer with excess; after 15-20 minutes, remove the excess. For maximum protection, after 2-4 hours, it is recommended to apply the same 3rd layer with the removal of excess.

Care

It does not require special care. The surface can be washed with a non-abrasive sponge with detergent. After each use of the sauna, it is recommended to dry the room. If the water-proof properties are reduced or if signs of wear appear, apply a thin layer of oil to the dry surface, rub and remove the excess.

Attention! Immediately after use, fill the contaminated tool and cloth with water and seal it tightly. Before disposal or storage, the cloth and the tool should be thoroughly washed with water and detergent and dried, or disposed of in a wet and hermetic packaging to avoid spontaneous combustion. Keep away from children. Do not use when allergic to natural substances.

Store at a temperature of +5..+35 C. Do not freeze (after defrosting, heat to +50..70 C and mix thoroughly). The shelf life is 5 years

Consumption

10-25 sq. m/l, depending on the type of wood and surface treatment.

Composition

Tung oil, Carnauba wax, bactericidal water minerals.

Country of origin of raw materials: Europe
